- ePassport module supports chips up to 72 Kbyte of ISO/IEC 14443 Type A and B

FEATURES PL 60

- High lamination speed and accuracy
- Digital control of lamination speed and temperature
- User-friendly operating panel with LCD display
- Infrared hot-roller heater system
- Power saving due to lower operating temperature and automatic control of speed and temperature

CONFIGURE YOUR ID SYSTEM, ASK FOR:

- EDIsecure® Image Capture Modules
- EDIsecure® Image Enhancement Software
- EDIsecure® Signature Pad
- EDIsecure® Biometric Enrollment Devices
- EDIsecure® Card Management Software Suite
- IDExpert® ToolACT

For large-scale ID card and passport applications, our software team is able to develop custom workflow management software using the powerful IDExpert® ProACT. With its state-of-the art and web-based system platform, users may perform various functions to manage, administer, personalize and encode cards, depending on the rights assigned to them. The system provides configurable interfaces that can be used to connect to multiple data sources or to integrate black list checks and biometric verification.

SPECIFICATIONS OF PP 380X
